

ARTICLE VIII

OFF-STREET PARKING AND LOADING

Section 1. Off-Street Parking Requirements.

There shall be provided at the time of the erection of any building, or at the time any principal building is enlarged or increased in capacity by adding dwelling units, guest rooms, seats, or floor area; or before conversion from one type of use or occupancy to another, permanent off-street parking space in the amount specified by this section. Such parking space may be provided in a parking garage or properly graded open space.

(a) Certification of Minimum Parking Requirements.

Each application for a building permit or certificate of zoning compliance submitted to the Building Inspector as provided for in this ordinance shall include information as to the location and dimensions of off-street parking and the means of entrance and exit to such space. This information shall be in sufficient detail to enable the Director to determine whether or not the requirements of this section are met.

(b) Combination of Required Parking Space.

The required parking space for any number of separate uses may be combined in one lot but the required space assigned to one use may not be assigned to another use, except that one-half (1/2) of the parking space required for churches, theaters, or assembly halls whose peak attendance will be at night or on Sundays may be assigned to a use which will be closed at night or on Sundays.

(c) Remote Parking Space.

Off-street parking required by this ordinance may be provided on any land within four hundred (400) feet of the main entrance to such principal use, provided, the area in which parking is to be located, is under full control of the operator of the principal use.

(d) Minimum Off-Street Parking Requirements.

The following off-street parking space shall be required.

Industrial Uses	1 space for each 2 employees on the largest shift and 1 space for every truck to be stored or stopped simultaneously

Article VIII

(e) Required Landscaping and Streetyards.

Where more than twenty (20) off-street parking spaces are required by this Ordinance or provided the following Landscaping provisions shall apply:

1. A landscaped streetyard shall be required for all vehicular surface areas located within one hundred (100) feet of a street right-of-way, unless separated by an intervening building. Minimum streetyard width is ten (10) feet, and shall be measured perpendicular to the street right-of-way. The streetyard shall be positioned between the vehicular surface area and street right-of-way. Each streetyard shall contain a minimum of two (2) deciduous or broadleaf evergreen trees per one hundred (100) linear feet, excluding points of vehicular ingress or egress. In no case shall any streetyard contain less than one (1) tree. Required must be a minimum of eight (8) feet in height at installation and shall be at least two (2) inches in diameter measured one-half foot above ground level. Where two (2) or more streetyard trees are required, all trees shall be planted twenty(20) to seventy-five (75) feet on center. Existing deciduous trees located in the abutting street right-of-way may be used to satisfy the distribution requirements above.

Within the required streetyard, the landowner or or developer shall use natural shrubs. Streetyard shrubs must be a minimum of eighteen (18) inches in height at installation, with a minimum height of thirty-six (36) inches within three (3) years of installation. Shrubs must be a locally adapted species which retain their foliage to within six(6) inches above ground level, and shall be spaced no more than eighteen (18) inches, edge to edge. No more than thirty (30) percent of streetyard shrubs shall be deciduous.

2. Landscaping required shall comply with the City's minimum sight line standards for street and driveways.
3. Required landscaping shall not obstruct or impede public pedestrian routes including sidewalks.
4. Any lighting shall be so shielded as to cast no direct light upon adjacent property.

- 5. Landscaping is required within parking lots where there are greater than 250 off-street parking spaces provided. A landscape space shall be provided on each end of every aisle. In addition, there shall be provided one landscaped space for every 50 spaces to be spaced evenly throughout the parking lot. The landscaping shall be equal to the size of a required parking space.

Section 2. Off-Street Loading Requirements.

The number of off-street loading berths required by this section shall be considered as the absolute minimum and the developer shall evaluate his own needs to determine if they are greater than the minimum specified by this section. For purposes of this section an off-street loading berth shall have minimum plan dimensions of twelve (12) feet by forty (40) feet and fourteen (14) feet overhead clearance with adequate means for entrance and exits. A loading space requirement may be modified or waived by the Board of Adjustment on application in the case of a bank, theatre, assembly hall, or other building or similar limited loading space requirements.

Number of Required Off-Street Loading Berths

Square Feet of Cross Floor Area	Required Number of Berths
0 - 25,000	1
25,000 - 40,000	2
40,000 - 100,000	3
100,000 - 160,000	4
160,000 - 240,000	5
240,000 - 320,000	6
320,000 - 400,000	7
Each 90,000 - 400,000	1
